ment, if a lady's maid is to be believed.

She has revealed the secrets of her

mistress' boudoir, or, rather, torture

chamber. The lady berself is now

beautiful, but one wonders that she is

still alive. For months she lay flat on

her back on the floor, motionless, with her arms close to her sides, during sev-

eral hours every day. This was, it ap-

pears, to improve her figure. During

the rest of the day, for the same period

of time, she sat on a high stool, giving

and rocking the upper part of her body

the constant application day and night for months of a spring bandage. One

nostril was originally larger than the

other, so she wore a small sponge in it

for a year. Her cheeks have been filled out and rounded by injections of

paraffin. Her ears for months were

compressed against the sides of her

head by springs, while heavy weights

were attached to the lobes to produce the required clongated shape, which has been successfully achieved. Hav-

ing suffered this complicated martyr-

dom for a year, the lady, as already

stated, is now beautiful. - Paris Letter.

Why Sailors Wenr Collars,

the wearers themselves, know the or-

pigtails, which they were in the habit

of keeping very greasy, the backs of

their coats used to get in a very dirty

and untidy condition owing to coming in contact with the hair, consequently

the order was given for a detachable

and washable collar to be worn, so that they might look more tidy.-London

The Baby Beetle's Cradle. If, at almost any time of the year, we walk through the woods where the red scarlet, black or pin oaks are growingthat is, where we find those that riper their acorns in two seasons and therefore belong in the pin oak group -we shall probably find on the ground fallen branches that vary in size from that of a lead pencil to that of one's thumb or even larger. These at the broken end appear as if cut away within the wood, so that only a thin portion is left under the bark. Within the rather uneven cut, generally near the center of the growth, is a small hole tightly plugged by the "powder post" of a beetle larva. Split open the branch or twig, when a burrow will be seen, and the little, white, soft, hard jawed larva that made it will be found or perhaps the inactive pupa.-St. Nicholas

Its site I nion what is known as high barn no a local that was crowned to to three with a boost royal growth of motoric forest trees, and amon these trees is the town of to-day, "1 its beautiful cottages and well scadwalks and streets. The result i that all along the wide avenues that intersect the town are lordly live and water oaks and hickories, many of them draped with graceful festoons of the gray Spanish moss, that overarch the street and walks, and among these are interspersed tall tropical palmettos. glossy leaved magnolias, fragrant bays and coral berried holly, and many other varieties, while in many places the wild grape, the trumpet vine and the ampelopsis climb and cling among the branches forming shady bowers and adding grace and beauty.

The town lies parallel with the Halifax River, and extends for nearly two miles along the shore. This river is the delight of the angler and exhibitating sport known to man. Bethe yachtsman and forms one of the to an's greatest attractions.

The main avenues that run parallei with or intersect the river are ail 100 feet wide, except Beach street, which is about sixty-five feet, but has a half-mile of open, beautiful water abutting upon its eastern side, where the salt waves ebb and flow and along and across which comes the cooling. invigorating and health-giving breezes from off the wide Atlantic, which temper and render the Halifax climate one of the most perfect in the world. The Beautiful Cottages

that have been erected during the past years and are being built are render ing Daytona as famous for its fine homes as for its beautiful river, treeand avenues, and they are adding yearly to its attractions.

Not the least of these attractions to those securing homes in the South and ranking second only to health fulness and perfection of climate, is the fact that its population is chiefly composed of cultivated and intelligent people, accustomed to the refinements of home and social life. Added to these features are good churches, good public and private schools, stores. hotels, laundry, meat markets, novelty works, an opera house, electric lights for street and house illumination, a good telephone system, ice factory, Lily Water Works, and hot and cold baths, etc., and everything else can be procured that is necessary to make life comfortable. An important feat. ure in the healthfulness of this town is the

Daytona Beach

lies one mile east of the town. It is approached by three good bridges over the river and well-graded avemass, and is the principal semmer resort south of St. Augustine. It has more tourists during the summer than all other places south of that city combined, and is also becoming a favorite winter resort. The beach is wide, firm and smooth, by many considered the linest in the world, and the surf bathing is safe and excellent summer and winter. People who have tried Northern and Western summer resorts declare that there are none so perfect in comfort as Daytona beach.

Automobile Race Meet.

The Florida East Coast Automobile Association conducts an annual race meet on the beach, which has now a universal reputation as the greatest automobile race course in the world. The Daytona-Ormond Beach is bard as macadam, and an ideal stretch of thirty or more miles without a ... break makes it the natural racing ground for America.

At low tide the beach is bared for 300 feet and neither carriage wheel bicycle or pedestrian can make : hardly visible imprint on the smooth and well-packed sand. It is no un common sight to see sail-rigged bicy cles speeding with the velocity of the wind before a stiff breeze along the smooth beach, thus affording the most sides these, miles of hard-shelled palm fringed boulevards bring the lovers of the wheel and vehicles into direct touch with the mainland over the broad bridges which span the splendid Halifax River.

The beach from the sandy bluffs to the lowest point at coblide, measures about 500 feet, and the average depth of the surf measures about two feet. A continuous gentle swell rolls in from the ocean from one to two feet in depth under normal conditions, mak ing the beach an attractive and absolately safe place for surf-bathing. Here the infant as well as the grey baired veteran of many summers, can safely enjoy the luxury of a sea bath throughout the larger part of the year. while the strong and expert swimmer. can venture out further to test his strength and skill in battling with the inexhaustible powers of the mighty

lying between river and ocean is one half mite wide, and is being rapidly Improved, and there are many fine cottages and several good hotels, ar pera house, two ocean piers, beach pavilion and a large casino,

A Remarkable Feature

at Daytona has been the yearly improvement in the style and value of the buildings that are being erected or homes. Men of capital of the North and West have become awaken ed to its advantages for winter residences, and valuable lots are being purchased and costly houses, beautiful in design and finish, are being erected, and beautiful homes, the abodes

of wealth and culture are multiplying. Seabreeze (City Beautiful) and Goodall are settlements on the Ocean side of the peninsula across the Hall-

fax River from Daytona. At the foot of Ocean Bonleyard, Seabreeze, a pier reaches 600 feet across the beach into the swelling surf of the ocean. This pier is a

favorite resort of those who delight it the sport of fishing. The surf here abounds in trout, pompano, yel lowfail, cavalle, whiting, drum, sheepshead and many other varieties of edible fish. During the fall season sport, and it has been no uncommon shape of gas, which soon passes away, only half a mile back of the ocean, is equally famous for its fine tishing.
